Consumer Price Index (CPI)

APRIL 2025

THE INFLATION RATE FOR THE MONTH OF APRIL 2025 WAS 11.6 PERCENT

"Today, the Liberia Institute of Statistics and Geo-Information Services (LISGIS) is pleased to present to you the Consumer Price Index (CPI) Report for the month of April 2025. The report looks at the Inflation Rate (monthly and year-on-year) for the period under review. We hope this report will aid the work of public policymakers and other interested data users in the private sector and those in the field of research".

- Hon. Richard Fartoma Ngafuan
Director General

KEY HIGHLIGHTS

- Year-on-year (y-o-y) headline inflation for **April** 2025 was 11.6%.
- Month-on-month (m-o-m) inflation for **April** 2025 was negative 0.8%.

2 Y-o-y Food inflation was 7.5% while Non-food inflation was 13.6%

3 Y-o-y inflation on imported items was 6.6% and the inflation on domestic items was 16.3%.

Table 1: Consumer Price Indices and rates (April 2024 – April 2025)

Month	CPI (Dec 2005= 100)	Change (inflation %)	
		Monthly (m/m)	Yearly (y/y)
Apr. 2024	697.6	-0.1	9.7
May 2024	698.5	0.1	6.2
Jun 2024	713.0	2.1	6.2
Jul 2024	750.8	5.3	6.4
Aug 2024	766.3	2.1	6.2
Sept. 2024	767.3	0.1	7.7
Oct. 2024	764.1	-0.4	7.2
Nov. 2024	757.9	-0.8	8.2
Dec. 2024	760.9	0.4	10.7
Jan. 2025	780.2	2.5	11.9
Feb. 2025	790.9	1.4	13.1
Mar. 2025	785.2	-0.7	12.4
Apr. 2025	778.9	-0.8	11.6

April 2025 Inflation

The inflation rate for April 2025 was 11.6%, 0.8 percentage point lower than the previous month. The month's y-o-y inflation rate is the percentage change in the Consumer Price Index (CPI) of April 2025 and April 2024. The inflation rate increased by 1.9 percentage points from April 2024.

The month-on-month inflation in April 2025 was negative 0.8%. The m-o-m inflation rate in March 2025 was negative 0.7%.

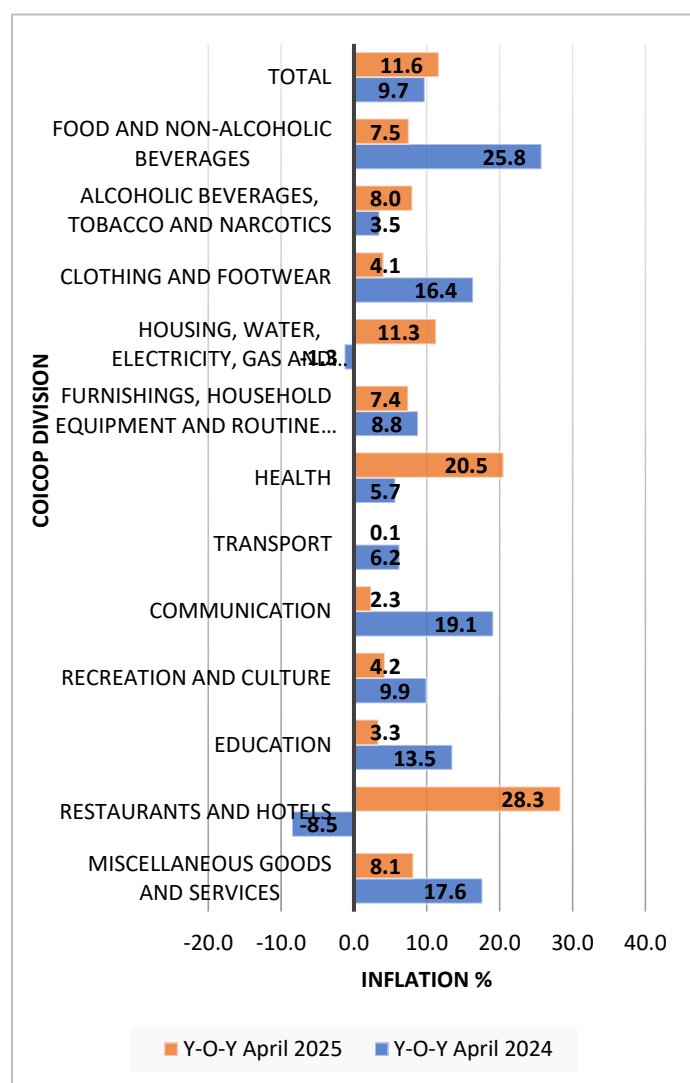

Figure 1: Year-on-year inflation – April 2024 and April 2025, by Division

Food Inflation

The y-o-y Food inflation for April 2025 was 7.5%. This is a decrease of 1.6 percentage points from the previous month. The y-o-y Food inflation rate has declined for the third consecutive month and is lower than the average of the last 12 previous months. The m-o-m Food inflation was negative 2.8%. The general price level of food and non-alcoholic beverages decreased between March 2025 and April 2025.

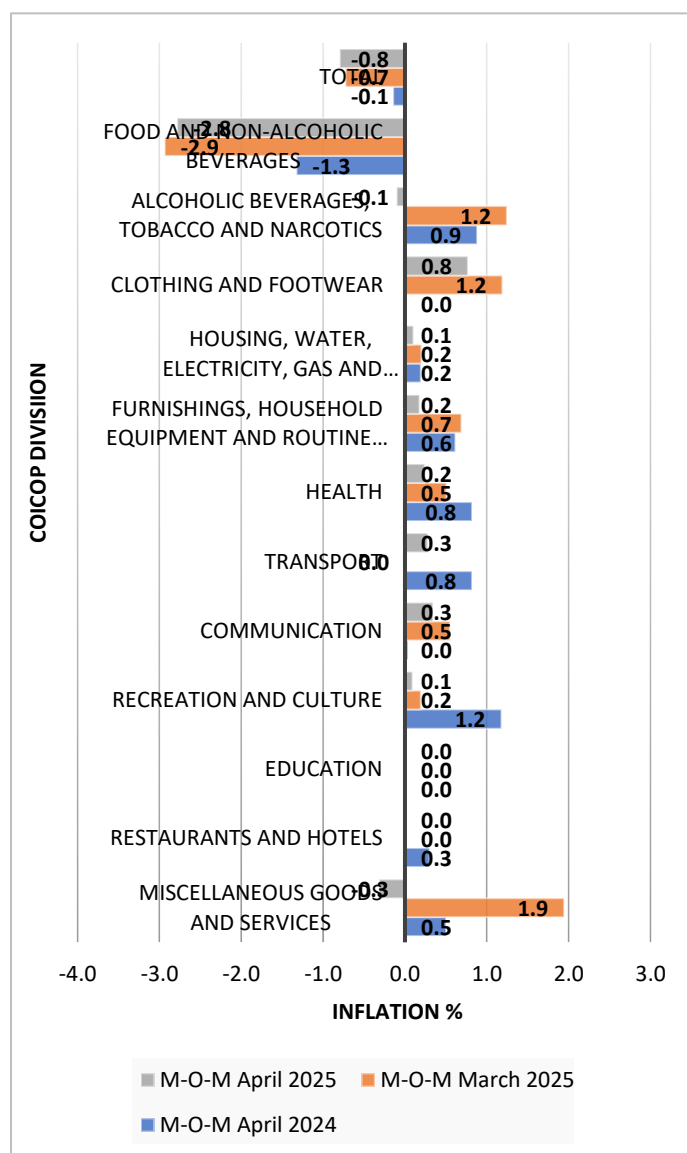

Figure 2: Month-on-month inflation - April 2025, March 2025 and April 2024, by Division

Newsletter Consumer Price Index (CPI) April 2025

Vegetable and Cheese, milk & eggs are the only classes within the Food and Non-alcoholic Beverages Division that recorded negative year-on-year inflation rates. Fruit, Bread & cereal and Fish recorded double-digit inflation. This indicates that the price level of the food classes increased between April 2024 and April 2025. Fish recorded the highest y-o-y inflation (19.4%) while Vegetables recorded the lowest (-9.7%).

On a month-on-month basis, Oil and fats recorded the lowest change (-13.6%) while Fruits recorded the highest (2.2%). Vegetable also recorded a significant m-o-m change, negative 12.3%. Onions was the major contributor (-25.1% m-o-m) to the significant monthly change for Vegetables.

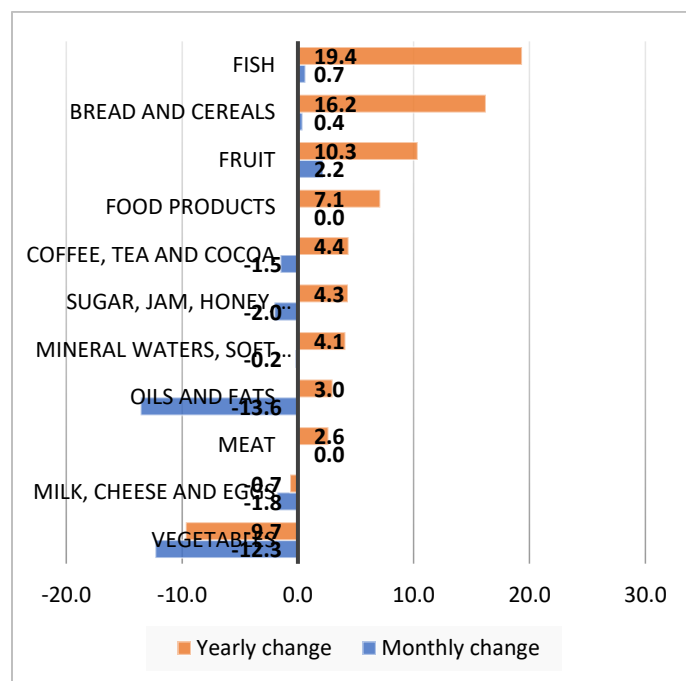

Figure 3: Y-O-Y and M-O-M inflations for Classes within the Food and Non-alcoholic Beverages

Non-Food Inflation

Year-on-year inflation for Non-food items for the month was 13.6%. Non-food inflation for April 2025 increased by 10.2 percentage points from April 2024. The month-on-month inflation for the Non-food category was 0.1%.

At the Division level, Restaurants and hotels recorded the highest year-on-year inflation rate of 28.3% while Transport recorded the lowest, 0.1%. The y-o-y inflation of Restaurants and hotels was highly influenced by food outside the household (restaurant, cook shop etc.) which recorded a year-on-year change of 26.5%.

Seven Divisions within the Non-food category recorded positive month-on-month changes. Education, and Restaurants & hotels recorded zero m-o-m change while Alcoholic beverages and Miscellaneous goods and services recorded negative month-on-month changes.

The general price level for non-food items increased between March 2025 and April 2025 but slightly (0.1%).

Method of Calculating Indices

For the computation of indices, two methods are used: For Elementary Indexes, the Modified Jevons (Geometric Average) Index Formula is used while the Modified Young Index Formula is used to compute higher-level Indexes.

All items within the Basket are grouped according to the Classification of Individual Consumption according to Purpose (COICOP 1999), an international hierarchical classificatory scheme developed by the United Nations Statistics Division to classify and analyze individual consumption expenditures incurred by households. The 12 functions are being used for Liberia's CPI Compilation.

The index reference period for the overall index along with the 12 COICOP Divisions is December 2005. These indexes were chain-linked. The index reference period for the Group, Class, and Subclass is December 2018.

Limitations of the CPI

Liberia's CPI data for market items are only collected in the four major markets of Monrovia and its immediate environs of Paynesville and Bushrod Island. For service items, data are collected in all major supermarkets, shops, stores, restaurants, hotels etc. in Monrovia and its immediate environs.

Dissemination

A bulletin on the April 2025 CPI and more detailed data in Excel format have been posted on the LISGIS website www.lisgis.gov.lr. The monthly CPI Report is published on or before the 15th of each month for the previous month.
